H. P. 2908 RHOEO DISCOLOR

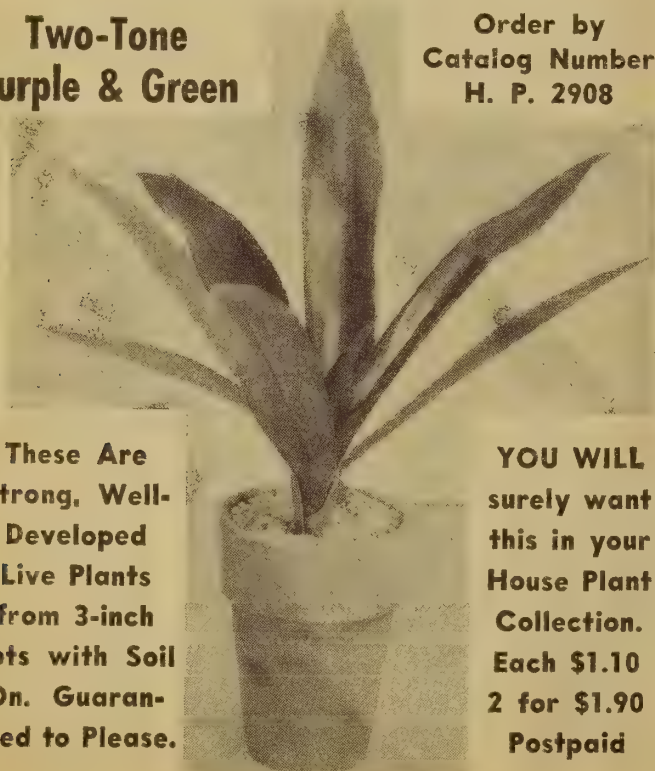

Also known as Moses in the Bulrushes

Each \$1.10—2 for \$1.90 postpaid

Ladies here is something new and outstanding. The only one of its kind in existence. Produces large broad palm-like attractive stems or leaves about 1½ inch wide and 8 to 10 in. long, grooved down the center, 7 to 8 to a plant with continuous growth. Leaves are deep green on the upper side and underneath a rich purple. With this combination of color when the sun shines on it, it is very fascinating. As the new leaves begin to form from the crown they shoot forth very fine white flowers which are open in the morning and close at the end of the day. As the leaf develops the small white flowers drop off. Quite unusual. Easy to grow as a House Plant during winter months and a fine ornamental pot plant for your porches in the summer. We are sure you will want some of these in your House Plant collection this winter.

1350 Emerald Green for Sunny Positions *Reliable Low Price Mixture*

Very satisfactory low priced mixture of standard re-cleaned native grasses that we recommend second only to our Velvet Green Mixtures. This like all our Grass Seed contains no Timothy, which is really "Hay Seed," a stooling plant that has no place in Lawn Seed Mixtures. 1 lb. \$1.05; 2½ lbs. \$2.50; 5 lbs. \$4.75; 10 lbs. \$9.00; 25 lbs. \$21.25; 50 lbs. \$40.00; 100 lbs. \$75.00, prepaid.

1224 Blue Grass, Fancy Kentucky

The most important and basic item for good lawn seed mixtures. We offer the very finest new crop, re-cleaned, state tested 23-lb. seed of high purity and strong, vigorous germination. Sow one pound to 300 sq. ft. for good lawns. 1 lb. \$1.35; 2½ lbs. \$3.25; 5 lbs. \$6.25; 10 lbs. \$12.00; 25 lbs. \$28.75; 50 lbs. \$55.00; 100 lbs. \$105.00, prepaid.

1230 Merion Kentucky Blue Grass *Extremely Hardy*

The latest introduction in superior fine Blue Grass. Of extreme high purity and strong vigorous germination. It produces more of a spreading root system than the Kentucky Blue Grass; hence, in seeding we recommend a pound for 700 sq. ft. Requires few more days to start growth than the Kentucky Blue Grass. Very shy seeder, so priced considerably higher per pound, but it goes almost twice as far in seeding, so cost is not much higher than Kentucky Blue. 1 lb. \$3.20; 2½ lbs. \$7.95; 5 lbs. \$15.75; 10 lbs. \$31.00; 25 lbs. \$76.25, prepaid.

EGG PLANT

Delicious Vegetable—Easy to Grow. Include in Your Garden This Spring. 1 oz. of Egg Plant seed will produce about 1000 plants.

May be cooked in various ways. The fruits are at their best edible stage when the skin has attained a high gloss. Use when young, at which time the seeds will be small and hardly noticeable. Keep fruits picked off as they become ready and plants should bear until frost. A rich, sandy, warm soil produces the best plants and yields the highest number of fruits. Seed should be started in a hotbed, or indoors in shallow boxes, 8 to 9 weeks before the time to set the plants out in the garden. Don't plant in the garden until danger of frost is past.

380 Large New York Purple

This is an improved strain entirely spineless that we highly recommend for home and commercial planters. Plants 30 inches tall; very productive, bearing 4 to 6 or more large, handsome dark purple, symmetrical broad egg shaped fruits of the highest quality. Pkt. 20c; ½ oz. 50c; oz. 80c; ¼ lb. \$1.75; ½ lb. \$3.25; lb. \$6.00, postpaid.

378 Black Beauty Early

As large as the New York Improved, but about ten days earlier. The skin is a rich, lustrous purplish black—the satin gloss and rich coloring add greatly to the beauty of these "eggs." The intensely brilliant coloring is uniform over the whole fruit. Pkt. 20c; ½ oz. 50c; oz. 80c; ¼ lb. \$1.75; ½ lb. \$3.25; lb. \$6.00, postpaid.

Oh! What a garden. There were Asters, Ageratums, Alyssum, Gaillardia, Balsam, Nasturtiums, Poppies, Petunias, Pansies, Salvia, Zinnias, Verbenas, Snapdragons and many other Annuals. It surely was a gorgeous sight. All-American Parsnip is a highly improved type, producing uniformly large and handsome roots of stocky form, heavy at the shoulder, well rounded, gradually tapering to the base, so that they are easily dug, and if grown in properly pulverized soil, the roots will be smooth and free from wrinkles and side roots. The flesh is white, of fine texture, free from core and stringiness, and especially fine flavored, cooking tender, sweet and rich, rendering it one of the finest of table vegetables for winter use. Sweet as Sugar Customer Writes

Cushing, Okla., Aug. 28.

Condon Bros. Seedsmen.

Gentlemen: Last year I ordered some of your Supreme Perfection Muskmelon Seed at Springdale, Arkansas. I had some of the seed left over and planted 70 hills here at Cushing. I don't believe that I had a melon that weighed less than 7 lbs., and many weighed 15 lbs. and over. It was as sweet as sugar, with thin rind. I have raised lots of Muskmelon in the past, but this melon takes the head of the class.

Yours very truly, C. G. BATHE.

500 Kleckley's Sweets No. 6—Wilt Resistant

Great 80 day Melon—"Sweetest of All"

Suitable for Shipping One to Three Hundred Miles

There is no melon superior in quality to a good strain of Kleckley Sweets. The bright scarlet flesh is the ideal of water melon quality—firm, crisp, entirely free from stringiness or cotton, and "sweet as sugar."

The melon is oblong in shape, about 20 inches in length by 10 to 12 inches in diameter. The skin is a rich dark green; the rind is thin and brittle, and for this reason the melon is not a good shipper to a distance beyond two or three hundred miles, but for home use and nearby market consumption it's got 'em all backed off the list. Our seed is all saved from hand selected, uniform, well shaped, fully matured, ripe melons. This extra care in selecting the melons from which the seed is saved costs a little more than the method generally used but it insures you seed of the highest quality with strong, vigorous germination. Pkt. 15c; oz. 45c; ¼ lb. 75c; ½ lb. \$1.25; 1 lb. \$2.00; 2 lbs. \$3.50; 5 lbs. \$7.50, postpaid.

Mushroom beds may be made in a warm, dry cellar or in any building where the frost does not penetrate, and in the open air during the summer and fall months. Having procured the spawn, the next thing to be attended to is to make preparations for the beds. About a fortnight or three weeks before the beds are to be made collect a quantity of fresh horse manure without the straw; place it in a heap under cover, and as it heats keep turning it over once or twice a week, until the fiery heat has become exhausted, which will require from ten to fourteen days' time. When the manure is in a condition to be made up, lay out your bed according to complete easily-understood directions which we send free with each order. One brick will spawn a bed 10 feet by 10 feet.

"The World's Greatest" Main Crop Tomato

Absolutely Coreless, Practically Seedless, Solid Meat, and a Beautiful Bright Red Color. If you don't give this grand variety a trial this year you are neglecting your own interests

In shape, **MATCHLESS TOMATO** is smooth, well-formed and extremely deep from stem to blossom, making it unusually heavy. It ripens evenly to the stem and is without ridges or cracks; it has great meatiness and few seeds. It is firm without being hard, unrivalled home and market tomato. The vines are vigorous but compact. The joints are short and it always fruits in large clusters at every second joint, which accounts for its wonderful productiveness. **Matchless Tomato** is the heaviest for its size of any variety and, on account of its brilliant red color, depth and solidity, is one of the handsomest tomatoes. Its beautiful appearance and color make it sell ahead of all sorts, and its unusual solidity, few seeds and desirable form for rapid peeling without waste, make it a most desirable canning and slicing variety. It costs you no more; takes no more time to grow the best than it does to grow the more common sorts and we think you will find **Matchless Tomato** one of the **Grandest Tomatoes** you have ever grown. Paducah, Ky., March 4,

Condon Bros., Seedsmen:

Gentlemen: Last year we planted a package each of your "First Of All" and "Everbearing" Tomatoes. We set out 600 plants about the first of May. They survived a frost that killed most of the Tomatoes in the neighborhood. We picked the first ripe ones July 4, and when frost came about the middle of October we were still picking Tomatoes from those same vines. I canned 50 gallons of Tomatoes and gave away 19 or 20 bushels of them and I have no way of telling how many bushels lay there and rotted. Last year was the driest we have had in some time but our vines stayed nice and green all summer. We certainly don't want to miss planting some of them each time we raise a garden. We have good luck with your other seeds too.

Yours sincerely, Robert C. Boulnois, Rt. #4.

1111 NEW HARDY AMARYLLIS

Hallii Lycoris Squamigera AMAZING SURPRISE LILY

Wasn't sure we were going to have them when part of the Catalog went to press so that is what puts it out of alignment with other bulbs. BE SURE TO INCLUDE THEM IN YOUR GARDEN THIS SPRING.

This amazing bulb produces attractive green foliage in the spring. The foliage then dies down. In

August, the flower stalks shoot up 2 feet tall with large lily-shaped flowers, a lovely orchid-pink. There are often 8 to 12 flowers on a single stem. When cut, they will last a week. Perfectly hardy here but we do not advise planting in cold states like Minnesota, Dakotas, etc. Plant so the bulb is covered with 4 to 5 inches of soil, in sun or part shade. We recom-

mend a winter mulch to prevent alternate thawing and freezing. Before the spring foliage dies down, put in a small marker so you will know where the bulb is and not hoe it up. The bulb multiplies, so each passing year there are more flowers.

Large Bulbs (7 to 8 inches around). Each 65c, 2 for \$1.20, 6 for \$3.00.

It grows very tall, attaining a height of 8 to 10 feet; is prolific in its nature, having from two to three ears to the stalk, makes a heavy thick growth of fodder, and is altogether, in our opinion and in the opinion of those who have tested it, the best and most productive of ensilage corns. **POSTPAID PRICES**—1 lb. 60c; 2½ lbs. \$1.25; 5 lbs. \$2.25. **NOT PREPAID PRICES**—¼ Bu. \$1.90; ½ Bu. \$3.50; Bu. \$6.75; 2 Bu. and over @ \$6.50 per Bu.

Ft. Collins, Colo., Aug. 23
Gentlemen: Your "Silo King" Corn is everything you say. Our field of Corn stands 13 feet, 6 inches tall, each stalk has 1 to 4 ears of Corn and the greatest amount of foliage we have ever seen. This field is the envy of the surrounding territory and I'm sure there will be many acres planted next year. Yours truly,

William Scheller, Rt. 4, Box 172.

1309 FUNK'S-G-114-HYBRID SEED CORN—BEST BY TEST

Field Scene of One of Our Fields of "G"-114 Hybrid Seed Corn Grown Here at Rockford

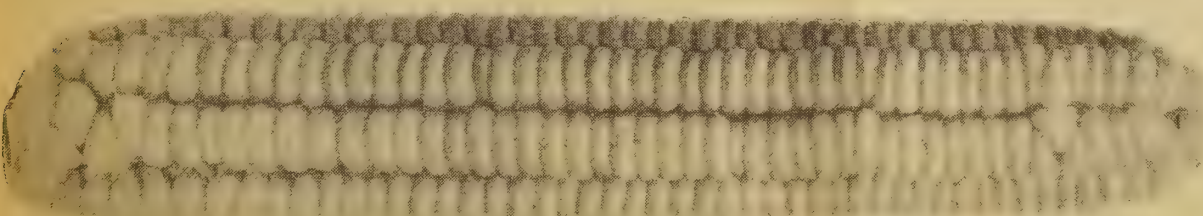

Some people call it "intestinal fortitude." Others call it simply "guts." Anyway, in G-114, it's the ability to stand up against the beating that the North Central Corn Belt often hands out in weather and in insect attacks. Against cold spring dampness. . . . Against scorching summer drought. . . . Against blasting wind. . . . Against corn borers and other insect enemies. G-114 comes through. Even when harvest is long delayed, G-114 stands, firmly erect. In Iowa 4-year tests, its percentage of lodging was lowest (2.9%) of any strain entered. And it yields with the best. G-114 foliage stays green after the ear starts to mature, making the extra starch necessary to finish both a heavy ear and a strong stalk. **POSTPAID PRICES**—1 lb. 70c; 2½ lbs. \$1.60; 5 lbs. \$3.00. **NOT PREPAID PRICES**—¼ Bu. \$3.25; ½ Bu. \$6.15; Bu. \$11.90; 2 Bu. and over @ \$11.85 per Bu.

They are different than most plants, requiring acid soil; therefore, before planting mix a little Peat Moss, sawdust or leaf mold with the soil to keep it acid. Berries grow in clusters like small bunches of Grapes. Sweet and mild with hardly any seeds. Fruit ripens from early July until the forepart of August. Plant no less than two to insure cross-pollinization.
